The CIC23 conference committee invites proposals for workshops to be held in conjunction with the October meeting. Workshops are distinct from short courses and are offered to enhance the opportunities for face-to-face collaboration among conference attendees. Workshops often are organized around emerging research areas, technical challenges, and/or industrial applications.

**Who**
Individuals or groups planning to attend CIC23 may submit a proposal for a workshop.

**What**
Workshops may take a variety of forms, but should focus on a discrete topic. Emerging, controversial, or topics that are a bit off-topic for the main conference program can make excellent themes, as do technical challenges and specific applications. The topic may suggest a best structure for the workshop.

Examples of workshop forms include:

- **Paper-based Discussions**
  - Full papers are presented as during technical sessions, but much more time is left for moderated or open discussion/debate. Presentation length may vary.
  - Papers available before workshop. Participants expected to have read the full paper. Authors provide ~5-minute refresher. Organizer leads discussion/debate about contents.

- **Panel Approach:** Presentations given; paper may or may not be submitted. Organizer leads discussion/debate about contents.

- **Roundtable Approach:** May or may not have papers or presentations. Organizer leads discussion/debate about topic.

- **Course Approach:** Presentations by a series of experts on specific aspects of a process.

- **Outcome-focused:** Participants meet specifically to come to a consensus on a particular process, guideline, etc. There is an expected outcome: a white paper, set of guidelines, etc.

- **Hybrid:** Combination of approaches.

**When**
Workshops take place on the morning of Friday, October 23, 2015. They are 3 hours in duration, with a 30-minute break half way through.
Attendees indicate participation in a workshop at the time of registration. Workshops are open to all conference registrants at no additional charge.

Where
All workshops will take place at the conference venue.

Why
Workshops provide participants with an opportunity to present and discuss novel research ideas on active and emerging topics related to color and imaging with colleagues in an intimate setting. They extend the technical topic and networking reach of a traditional conference.

How to Submit
Workshop proposals must be submitted as noted below. Proposals will be reviewed by the CIC23 Workshop Chairs in coordination with the Conference Committee.

In three (3) pages or less, submit the following:
- Name of the proposed workshop.
- Description of the workshop, including its type, an abstract, list of objectives/goals, relevance to CIC, and expected outcomes.
- Preliminary list of invited speakers (if any).
- Whether you expect any of your speakers (if applicable) to submit an abstract and/or paper for the proceedings.
  - Note that presenters who want to have a final paper published in the Proceedings will be subject to standard CIC peer-review process. The paper must adhere to CIC paper guidelines, including a length of 4-6 pages.
  - Non-peer-reviewed papers are placed in an appendix of the Proceedings.
- Individual(s) responsible for organizing and running the workshop. If more than one, designate primary contact person.
- Complete contact information (address, email, and phone) for all organizers.

Important Dates
Workshop proposals due: February 13, 2015
Notification of decision: February 20, 2015
For accepted workshops, a 300-word description for the preliminary program: May 23, 2015

Questions
Contact CIC23 Workshop Chairs Jérémie Gerhardt and Albrecht Lindner via color@imaging.org. Please put the name of the workshop in the subject line.
