

2023 Friends of HVEI Banquet

a gathering for researchers at the intersection of human perception and imaging technology

Hosted by Human Vision and Electronic Imaging Conference Chair Damon Chandler with support from META

Mission Room • PARC 55 Hotel

Wednesday, January 18, 7:00 – 10:00 pm

featuring a talk by

Timo Kunkel, director of image technology and standards, CTO Office, Dolby Labs, Inc.

How to Let Your Pictures Shine!

The Impact of High Dynamic Range Imaging on Photography

High-Dynamic Range imaging, better known by its acronym “HDR”, has established itself as a foundational component when looking at the aspects defining today’s image fidelity. Together with the availability of wide color gamut (WCG) approaches, HDR has influenced and shaped both the technical tools and the creative means of photography. This talk will touch on the intersection of HDR technologies and the artistic expression it enables, from scene lighting and composition via camera capture and processing, to print and display.

Register online at www.electronicimaging.org (you may add to your existing registration)

OR return to registration@imaging.org or via fax to +1 703 642 9094 by January 9, 2023. Space is limited.

For questions or to register for the banquet via phone, contact +1 703 642 9090 x0

Banquet Registration Form

___ (number of tickets) @\$75 (all inclusive) = **Total \$** _____

Name(s) of attendee(s): _____

All meals include Hawaiian Hearts of Palm salad, entree (select below), 3 beverages of choice, and dessert (dark chocolate pâté)
